Education

- Sardar Vallabhbhai National Institute of Technology (NIT Surat)** *Surat, Gujarat*
B.Tech — Electronics & Communication Engineering | CGPA: 9.08 *2023 – 2027*
- Gajera International School, Katargam, Surat** *Surat, Gujarat*
Class 12th - Percentage: 92.4% | Class 10th - Percentage: 92.7% *2021 – 2023*

Projects

- Multi-User Agentic Graph RAG Web App**   *June 2026*
Tools: Python, React, FastAPI, LangChain, NetworkX
 - Built and deployed a full-stack agentic AI app on Hugging Face Spaces for PDF-based Q&A with interactive knowledge graph visualization.
 - Designed a custom Graph RAG pipeline using SpaCy, Gemini embeddings, ChromaDB, and NetworkX, improving answer accuracy from 58% to 74%.
 - Engineered agentic graph traversal with LLM sufficiency checks, reducing retrieved context by 16% compared to vanilla top-k RAG while maintaining answer quality
 - Architected a Dockerized multi-tenant backend with isolated vector stores and dynamic database provisioning, improving scalability and reducing response latency by 35%.
- Amazon ML Challenge 2025 (Multimodal Product Price Predictor)**  *October 2025*
Tools: DeBERTa-v3-small, HuggingFace Transformers, GLiNER, spaCy, BART-MNLI
 - Designed a two-stage multimodal product price prediction pipeline using product descriptions and structured metadata, reducing SMAPE from 51.72% to 45.60%.
 - Fine-tuned DeBERTa-v3-small and implemented 8-head cross-attention fusion between text embeddings and structured features, reducing RMSE from 14.33 to 12.48 (13% reduction).
 - Extracted brand entities via GLiNER and classified products into 10 food subcategories using zero-shot BART-MNLI across 46,000+ listings.
 - Developed a preprocessing pipeline for data normalization, unit standardization, and outlier filtering.
- ByteLearn: Full Stack E-Learning Platform**   *July 2025*
Tools: Node.js, Express, MongoDB, JWT, Stripe, React.js, Tailwind CSS, Vercel
 - Implemented JWT based role-based authentication and authorization for instructors and students.
 - Developed RESTful APIs for course, user, and lesson management following the MVC architecture; optimized database queries to reduce API response time by 30%.
 - Designed Mongoose schemas for 4+ collections supporting scalable user and course management.
 - Delivered a fully responsive UI in React and Tailwind CSS; improved user engagement time by 40%.
 - Integrated Stripe for real-time course payments and deployed backend on Vercel for continuous delivery.

Skills

- Programming Languages:** C/C++, Python, JavaScript
- CS Fundamentals:** Data Structures & Algorithms, OOP, OS, DBMS, IoT
- Machine Learning:** PyTorch, Transformers, HuggingFace, LoRA, QLoRA, RAG, Scikit-Learn
- AI Systems:** LangChain, ChromaDB, Vector Stores, spaCy, NetworkX
- Web Technologies:** React.js, Node.js, Express.js, FastAPI, MongoDB, REST APIs
- Tools:** Docker, Git, Linux, Vercel, Hugging Face Spaces

Achievements

- LeetCode Knight** (Max Rating: **1975**); solved **1000+** DSA problems across LeetCode, Codeforces, and CSES.
- Author of a research paper accepted at **IEEE International Conference SPCOM 2026**.
- Selected for **Amazon ML Summer School 2025**.
